

SKM SIDDHA AND AYURVEDA
NATURE'S WEALTH. OUR VALUES

AN ISO 9001:2008 & GMP CERTIFIED COMPANY

ISO
certified

Trusted Expert of
Ayurveda, Siddha and Unani ...

**Manufacturers and Hospital Networks
for Ayurveda, Siddha and Unani Medicines**

A health science tradition three thousand years old

Ayurveda

It is a natural healing system of India that evolved into a distinct medical science around 1000 BCE. It has been enriched with contributions from sages like Charaka, Susrutha and Vagbhata. The object of Ayurveda is to counteract the imbalance of Tridoshas (Vata, Pitta, Kapha), the three vital elements that control the functioning of the human body.

Bringing the benefits of Ayurveda,
Siddha and Unani closer...

Siddha

Siddha is a holistic system of medicine in South India founded by 18 Siddhars, who were spiritually enlightened persons. The system comprises codified procedures for medicine manufacturing, disease diagnosis by Mukuutram (Thiridhosha theory) Nadi (pulse reading) Sara payirchi (Flow of respiration) and Attavitha paritchai (8 Types of testing). It uses a special group of herbs called Kayakarpa (Rejuvenation) herbs for treatment and preventive aspects.

Unani

Unani is a form of traditional medicine of Graeco-Arabic origin, based on the teachings of Greek physician Hippocrates and Roman physician Galen, and developed into an elaborate medical system by Arab and Persian physicians.

Unani medicine is based on the concept of the four humours: Phlegm (Balgham), Blood (Dam), Yellow bile (Safra) and Black bile (Sauda).

State-of-the-art Manufacturing Infrastructure

The SKM factory has an installed production capacity of 1200 tonnes per annum. It has approval as per **Drugs and Cosmetics Act 1940** for 700 products including Shastric and Proprietary Medicines. The factory has received the **Good Manufacturing Practices Certification (GMP)** certification in 2002 and is the first factory in Tamilnadu to get this certification. It has also been certified with **ISO 9001 : 2000** for successful implementation of Quality Management Systems. It has also got Pharmexcil registration for export.

The medicines are prepared in a clean environment by adopting highest degree of plant and personal hygiene to ensure safety and efficacy of the products. All GMP guidelines such as **Standard Operating Procedures, Batch Manufacturing Records, In-Process Controls and In-House Standards** are stringently followed to ensure the highest quality. The quality management plan starts from the selection of the vendors, creating SOP's (standard operating procedures) for testing of raw material, intermediate product and finished products, and the calibration of the instruments and manufacturing equipment. The **Quality Control and quality Assurance Lab** work in perfect coordination with the **Production Department** at each and every step of the process to maintain international standards of manufacturing.

"Committed to prevention and cure of diseases safely through herbal formulations and there by building a healthy society"
