### Creams

- \* Creams are less greasy compared to ointment.
- \* Water soluble bases make them easily removable from the skin
- \* Hydrating and moisturizing,
- \* Better suited for deep tissue therapies.
- \* Absorbed quickly and completely,
- \* Creams provide an oily barrier which reduces water loss from the stratum corneum.
- \* Creams interfere less with skin functions.
- \* Suitable for sensitive, and dry skin.
